UK: Bradford-based commercial refrigeration equipment manufacturer Epta UK has won The Manufacturing Innovation Award at *Insider's Made in Yorkshire Awards 2022*.

The awards, which this year celebrated their tenth anniversary, celebrate world-class companies based in Yorkshire and the Humber and the products they are making in the region and selling across the world.

Epta's award, for its recently developed Gazelle Eco, a chilled glass door multi-deck cabinet from the Costan range, was presented at a special evening last week at the Hilton Leeds City hotel.
