

Epta Deutschland celebrates its 25th anniversary

Date: 10 October 2022

In September, Epta Deutschland, with around 500 employees, celebrated 25 years in business. This is a real silver wedding anniversary, because union makes strength.

Just two years after the "marriage" sanctioned by the Nocivelli family, which established the foundations of the company, the German branch acquired a warehouse of no less than 5,000 square metres. And that was just the beginning.

In 2001, a service centre opened in Ludolf-Krehl-Straße in Mannheim, open 24 hours a day 365 days a year. A real point of reference for all customers in Germany.

Meanwhile, climate change demanded an immediate and effective response. Hence, Epta Deutschland became synonymous with cutting-edge refrigeration technology and innovative, eco-friendly refrigerated cabinets.

Just to give a few examples of Epta Deutschland's greatest achievements, it is worth mentioning the Tengelmann Klimamarkt. This was the first supermarket in the country with a transcritical CO2 refrigeration system.

What is the secret to achieving these milestones? Continuing to grow and innovate while maintaining the focus on two cornerstones: customer care and environmental protection.

"In September we celebrated 25 years of Epta Deutschland, an essential part of our family. Since its inception, it has proven capable of responding promptly to all the needs of the German market," said Marco Nocivelli, Chairman and CEO of Epta.

He added: "Ambition is the engine that fuels that tireless progress that has always distinguished us. But what makes it possible are the people, and we know it very well. To you at Epta Deutschland: thank you for your seriousness, perseverance and dedication and for being with us today, towards our golden wedding anniversary and beyond tomorrow".
