

Epta refrigerated cabinets at Fine Food Australia

Date: 23 October 2022

Fine Food Australia was held at the Melbourne Convention and Exhibition Centre (MCEC). An occasion that brought together professionals and brands from Australia and beyond.

Epta came to Australia to explore, discover, learn and expand its network. But it also wanted to show the world some of its most popular products used by the food industry.

In this context, the Group had proposals to meet the needs of each segment of the industry.

In addition, Epta presented some of its most innovative, efficient and sustainable cabinets.

Epta responds to the needs of commercial refrigeration with the Misa cold room, while for the Hospitality sector it proposes the solutions of its Iarp: plug-in display refrigerators and the refrigerated cabinets of the Delight, Amaze and Passion ranges, all belonging to the Cool Emotions. Perfect solutions to ensure proper storage and display of ice cream and frozen delicacies.

Wine and beverages are given a starring role by the display refrigerators of the Scarlet and Magenta ranges and the Joyvertical cabinets respectively.
