Epta presents its range dedicated to fridge technicians @SIFA 2023

2023-10-10

Epta presents its range dedicated to fridge technicians, with its sub-brands EptaTechnica and EptaService, at SIFA 2023, Interprofessional Refrigeration and its Applications Trade Show. Synonymous with the technological expertise of the Group, they interpret sustainable innovation as a system in which technical solutions and refrigeration services converge. Scheduled from 10 to 12 October in Paris – Porte de Versailles – the event alternates the exhibition of important technological innovations with conferences and technical-legislative insights, also organised at the Epta stand.
