

“Our aim is to grow through sustainable innovation, strengthening our leadership in commercial refrigeration.”

Marco Nocivelli,
Chairman and CEO, Epta Group

Founded in 2003, Epta is a global leader in commercial refrigeration systems. Placing environmental principles at the heart of its operations, the company positions itself as a Green Transition Enabler to the retail world leading the path to sustainable innovation, with high-performance, technologically advanced products that ensure energy and economic efficiency. Since succeeding his father in 2011, CEO Marco Nocivelli has expanded the firm’s global reach to more than 100 countries and reaching a turnover of 1.4 billion in 2023. “Our aim is to grow through sustainable innovation,” Nocivelli says, “strengthening our leadership in commercial refrigeration across our global network.” A recent joint venture

with Viessmann Refrigeration Solutions, and the acquisition of HEIFO, have consolidated the firm’s market position in Central and Northern Europe. As pioneers in carbon footprint reduction, Nocivelli considers it is Epta’s responsibility to serve as industry role models. With 270 R&D employees and a dedicated Innovation Centre, advances include using recyclable materials in its products, natural refrigerant gases, and remote monitoring to enhance efficiency, durability and longevity.

“We want to challenge the market,” Nocivelli says. “We want to be at the forefront with new ideas and products that provide value to our clients.”
