

## Epta Latam completed the renovation of store in partnership with Tecnonorte Group

Venezuela. Epta Latam, in partnership with the Tecnonorte Group, announced the completion of the works that were being carried out at the Gran Frigorífico Plaza Prado, located in the city of Caracas.

Both companies highlighted the effectiveness of the work synergy established to bring the work to a successful conclusion, as well as the good results obtained: "We are proud to present how the renovation project turned out, highlighting the collaboration and mutual commitment to excellence," they said.

The work for the renovation of this store consisted of the incorporation and equipment of state-of-the-art technology, including solutions such as:

- Eurocryor Comfort: These display cases are part of a range with a built-in condensing unit (as well as versions with a remote unit) and a refrigerated reserve. They are environmentally friendly thanks to the use of the ecological refrigerant gas R290, performance that reaches class 3M1, which makes them suitable not only for gastronomy, but also for the storage and display of meat.
- Costan Granbering: freezer cabinet with doors and built-in unit that works with R290 propane gas, allowing the presentation of frozen products. It is an integrated, easy-to-install plug and play solution designed for small and medium-sized retail areas. It combines a high load capacity and the energy performance of remote versions.
- Costan Granvista: refrigerated wall with doors and built-in unit that works with R290 propane gas for the presentation of pre-packaged fresh products. It is a plug and play solution designed for small and medium-sized sales areas. Available in the Water Loop and Air versions. In specific configurations it is available in a new version in energy class B, for energy savings of 26% compared to GranVista Integral in class C.
- Glad 2D: Two-door glass door freezer for ice cream and frozen foods.
- Thailand Valzer.

"With this project, we reaffirm our commitment to innovation, sustainability and excellence in refrigeration. This achievement reflects the collective effort of an extraordinary team and marks a technological milestone in the industry. We congratulate all those involved in making this renovation a reality and we especially thank Grupo Tecnonorte for their collaboration," added spokespeople for the Epta Latam company.
