*A new commercial refrigeration system using CAREL technology has been recently inaugurated at a Walmart supermarket in Buenos Aires.*

*This transcritical CO<sub>2</sub> system is result of the long-term partnership between EPTA and CAREL in Argentina. CAREL controllers installed on EPTA systems help ensure excellent performance in terms of energy saving and efficiency (COP), through the use of integrated parallel compression technology.*

*The willingness of the Walmart chain to try out transcritical CO<sub>2</sub> solutions opens the way for further pioneering environmentally-friendly investments in South America.*
