Epta believes the CSR Report must hold a central place in the Group's philosophy. It is an important step that represents a consistent and universal expression of the principles and values that underlie the style of the company and it has to be addressed with authentic determination. It is thus Epta's great pleasure and satisfaction to inform the public that it is continuing on the path that was started last year, thereby drawing up the 2014 edition of the CSR. This confirms Epta's will and focus on SUSTAINABILITY-oriented social progress.
