

Alessandro Nocivelli – Member of the Board of Directors

Electronic engineer qualified in Mathematics and Physics “cum laudem”, he has obtained many other qualifications that include MBA, masters and certificates in Italy, France and USA.

He began his career at Thomson CSF-LCR (Central Research Laboratory) in France where he was designer of a re-circulating optical memory. He continued to improve his professional skills in France where he gained experiences from the re-engineering of “*specialty gases*” division (at Air Liquide Electronics Europe). In 1998 he moved to the UK and began working for Noptronics Limited, where he developed a new architecture for dynamically tuneable optical filters.

In 1999 he founded Luceat Spa, a company specialized in the projection and manufacturing of anti-theft devices. He successfully guided the company as CEO until November 2016.

Since January 2004 he has been a member of the Board of Directors of Epta and is actively involved in the Control and Risk Committee.
